You are looking at a Toy set made by Dapol in the late 1980s. It consists of a base upon which the console sits. The base is 14 x 10 inches. The console itself is 7 inches in diameter and approx 4 inches high. The Tardis Walls and roof also make up this display.. There are several figures to go with it.

The console has two led screens which light up and the centre time column rises and falls and also lights up as it moves up and down. This requires 4 x AA batteries which I have included so you can use it straight away. It is in full working order.

The Tardis walls are made up of a Dapol Tardis which splits down to create the Tardis interior. The Tardis can be displayed on its own and has a flashing blue light on the top. This requires x 2 AA Batteries which I have also included.

The set includes a Dapol Seventh Doctor Figure and his companion Mel.

A very rare K9 is included. Rare because Dapol made a mistake and if you look you will see that K9 is green. Dapol realised their error and withdrew all the Green K9 Figures. K9 has pull back and go motion and whizzes round the base of the Tardis

If you look at the outside of the Tardis I have included companion ACE and Two Silurians and a Blue Dalek. (The dalek is missing his front wheel but still displays well)

These sets are very rare as Dapol lost its licence to produce Dr Who toys in the nineties. I think they went in to liquidation soon after.

All of the items described and in the pictures are included in this sale. Good Luck if you are bidding and thank you for looking.
